[desktop][sle15sp2] remove soft-failure in GDM login

2020-02-28 08:22 - zcjia

Status:	Resolved	Start date:	2020-02-28
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:			
Difficulty:			
Description			
From the discussion in https://bugzilla.suse.com/show_bug.cgi?id=1164856 , it's not a bug that user account is not selected by default in GDM, so the soft failure message "bsc#1086425- user account not selected by default, have to use mouse to login" doesn't apply for SLE15SP2+.			
So remove this soft failure from tests.			

History

#1 - 2020-02-28 08:46 - zcjia

- Status changed from New to In Progress

PR submitted: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/9656>

#2 - 2020-02-28 09:15 - zcjia

- Status changed from In Progress to Resolved

PR merged and no soft-failure: <https://openqa.nue.suse.com/tests/3935949>

#3 - 2020-02-28 10:06 - okurz

- Status changed from Resolved to In Progress

A common approach is to be strict to remove soft failures only for cases of VERIFIED bugs for multiple reasons. You can simply VERIFY the bug with the verification openQA job you used.

This is a bug for SLE15/15-SP1, but is NOT a bug for SLE-15-SP2. The soft failure I removed was FALSE-POSITIVE.
