**Description**

The new news.o.o looks great, but unfortunately it has a different URL for the RSS feed than the old wordpress, which causes breakage in feed readers.

Historically, the wordpress RSS feed had two valid locations:

- http://news.opensuse.org/?feed=rss2 (from my feedreader)
- https://news.opensuse.org/feed/ (from planet.o.o config)

Please setup redirects (in nginx or haproxy) for these two locations ASAP.

**History**

**#1 - 28/02/2020 01:01 pm - cboltz**
- Private changed from Yes to No

**#2 - 28/02/2020 01:34 pm - hellcp**
- Status changed from New to In Progress
- % Done changed from 0 to 50

I dealt with /feed/ in jekyll via [https://github.com/openSUSE/news-o-o/commit/09b89f567b3cc535ce651c8218b381fdaa09c7f2](https://github.com/openSUSE/news-o-o/commit/09b89f567b3cc535ce651c8218b381fdaa09c7f2) and [https://gitlab.infra.opensuse.org/infra/salt/-/merge_requests/352](https://gitlab.infra.opensuse.org/infra/salt/-/merge_requests/352) should fix /?feed=rss2 (as long as I actually did this correctly)

**#3 - 28/02/2020 03:34 pm - lrupp**
- Category set to Servers hosted in NBG

**#4 - 02/03/2020 07:09 pm - cboltz**

I found the solution for ?feed=rss2, based on [https://www.nascenia.com/nginx-url-redirection/](https://www.nascenia.com/nginx-url-redirection/)

```
if ($args ~* "feed=rss2") {
    set $args "";
    rewrite ".*$ /feed.xml redirect;
}
```

It's already in the hand-tuned config on jekyll.i.o.o, and works.

Please also add it to your MR ;-)
