

openQA Tests - action #64967

coordination # 15132 (Blocked): [saga][epic] Better structure of test plans in main.pm

coordination # 44360 (Blocked): [epic] Parameterize test suites within job groups

coordination # 55730 (Resolved): [epic] Move parameters from test suites into job groups

job templates are duplicated as job template in job groups as well as test suites

2020-03-29 11:07 - okurz

Status:	Resolved	Start date:	2020-03-29

Target version:			
Difficulty:			

Description

Observation

[scenario_opensuse-Tumbleweed-DVD-x86_64-desktopapps-remote-desktop-xrdp-client1@64bit_virtio](#) shows the not so helpful test suite description "The base test suite is used for job templates defined in YAML documents. It has no settings of its own." as it is defined within https://openqa.opensuse.org/admin/job_templates/1 with only " as description. The job template is defined in https://openqa.opensuse.org/admin/job_templates/1 probably due to [#60329](#) but I see it as a problem that we still have the test suite defined in https://openqa.opensuse.org/admin/test_suites . If this problem is there for one job template and test suite I assume the same is the case for other job templates and test suites.

Acceptance criteria

- **AC1:** Job templates inheriting from "testsuite: null" are not duplicated as test suites

Suggestions

- Check how often test suites are used on o3, if 0 times, delete it (optional: backup in before)
- ... if 1 time, ensure it's defined as job template and delete from test suites
- ... if multiple times, keep test suite and use in job templates rather than duplicating in job templates inheriting null

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2020-03-29 11:08 - okurz

- Parent task set to #55730

#2 - 2020-03-31 14:40 - tinita

Getting all testsuites used once:

```
SELECT ts.id, ts.name, count(*) AS c, STRING_AGG(jt.group_id::character varying, ' ') AS ids
FROM job_templates jt INNER JOIN test_suites ts ON jt.test_suite_id=ts.id
GROUP BY ts.id, ts.name
HAVING COUNT(*) = 1
ORDER BY ts.name;
```

o3: 19

osd: 1009

Getting all testsuites used nowhere:

```
SELECT ts.id, ts.name
FROM test_suites ts
LEFT JOIN job_templates jt ON ts.id=jt.test_suite_id
WHERE jt.id IS NULL;
```

o3: 105
osd: 147

- Status changed from New to Workable

Discussed with cdywan and tinita:

[tinita](#) please conduct backup of all test suites or the ones you want to delete, save backup to internal share folder, e.g. w3.suse.de. For that copy the data to any computer connected to the Nbg NFS/NIS shares , for example login with ssh to login.suse.de . For o3 you can attach to this ticket, there are no precious regcodes. Then delete all unused test suites (optionally inform users).

For the "test suites just used once" tinita found some users that do not want their test suites to be moved into job group yaml templates so we will leave this point for now.

#4 - 2020-05-15 14:58 - tinita

- File o3-testsuites-not-used-2020-05-15.tgz added

Today there are 118 testsuites not used in o3. There are two created this week, so I left them out.
Attached o3-testsuites-not-used-2020-05-15.tgz

Deleted 116 test_suites/test_suite_settings from database.

#5 - 2020-05-15 16:07 - tinita

Today there are 158 testsuites not used in osd. There are 7 created/updated this month, so I left them out.

Deleted 151 test_suites/test_suite_settings from database.

Copied the tarfile osd-testsuites-not-used-2020-05-15.tgz to login.suse.de.

#6 - 2020-05-15 17:58 - okurz

- Status changed from Workable to Resolved

osd backup is available on <https://w3.nue.suse.com/~timueller/osd-testsuites-not-used-2020-05-15.tgz>

Thanks [tinita](#)
