Description
As per: https://bugzilla.suse.com/show_bug.cgi?id=1166955#c10

I have added 2GB ram to jobs in the functional job group, which while fine... does this for all the jobs, so we're not testing the minimum anymore (Within the functional job group)

AC: all tests that use aGNOME=1 scenario, use the Machine ppc64le-2g
