coordination # 36712 (New): [saga] Use YaST specific framework for GUI testing

coordination # 50672 (In Progress): [functional][y][epic] Use libyui-rest-api for YaST modules testing

[functional][y] Add ability to enter text for editable YComboBox

2020-04-07 11:03 - oorlov

Status:	Resolved	Start date:	2020-04-07
Priority:	Normal	Due date:	2020-05-05
Assignee:	riafarov	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	future		

Description

YComboBox with input field does not allow to enter text using libyui-rest-api.

There are two types of YComboBox:

- With predefined values only (e.g. run `xdg-su -c "env YUI_HTTP_PORT=9999 /sbin/yast2 timezone"`):

Region

Europe

- With input field (e.g. run `xdg-su -c "env YUI_HTTP_PORT=9999 /sbin/yast2 timezone"` then press "Other Settings button...")

NTP Server Address

2.opensuse.pool.ntp.org

Task:

1. Make YComboBox to be able to receive action for entering text.
2. Optional: Make a check if the YComboBox is editable (YComboBox with input field has "editable": true parameter). Or consider delegating this check to client.
