[qe-core][functional][core] html5test.opensuse.org includes non-existing file

2020-04-11 20:45 - cboltz

Status:	New	Start date:	2020-04-11
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	future		
Description			
The error_log for html5test.opensuse.org contains several error messages like this: [...] open() "/srv/www/vhosts/html5test.opensuse.org/assets/modules.js" failed (2: No such file or directory), client: 195.135.221.150, server: html5test.opensuse.org, request: "GET /assets/modules.js HTTP/1.1", host: "html5test.opensuse.org", referrer: "https://html5test.opensuse.org/" This file (actually the whole assets directory) was deleted in the openSUSE branch, see https://github.com/openSUSE/HTML5test/commit/969fcbd06a780e8d3fc124ad8704e569057f2c71 Please either re-add the file, or remove the code that tries to include it. Sidenote: the openSUSE branch is 34 commits behind upstream - you might want to integrate these changes.

I'm wondering how this relates to openQA. Have you created the ticket in the wrong project?

#2 - 2020-04-23 17:42 - cboltz

AFAIK openQA uses html5test.o.o to do various browser tests, therefore I think it's indeed openQA-related, and openQA is probably causing most of the html5test.o.o traffic.

I slightly ;-) doubt that lots of human openSUSE users use this page.

- Priority changed from Normal to Low

#4 - 2020-10-22 13:36 - okurz

- Target version set to Ready

#5 - 2020-10-29 15:16 - okurz

- Tags set to functional, u, qsf-u, qe-core, core

- Subject changed from html5test.opensuse.org includes non-existing file to [functional][u][core] html5test.opensuse.org includes non-existing file

- Assignee set to tjyrinki_suse

- Target version changed from Ready to future

oops, this should actually not be on the backlog of the SUSE QE Tools team as it's related to a test specific instance.

@tjyrinki_suse I think this should be covered by QE Core related to all kinds of browser tests, w3m, curl, wget, etc.

#6 - 2020-11-06 09:38 - tjyrinki_suse

- Subject changed from [functional][u][core] html5test.opensuse.org includes non-existing file to [qe-core][functional][core] html5test.opensuse.org includes non-existing file

#7 - 2021-09-08 09:13 - tjyrinki_suse

- Status changed from New to Resolved

- Assignee deleted (tjyrinki_suse)

This is working nowadays.

#8 - 2021-09-08 19:51 - cboltz

- *Status changed from Resolved to New*

I'm sorry to disappoint you, but when I open `html5test.o.o` in firefox, I still see a 404 error for GET `https://html5test.opensuse.org/assets/modules.js`

I know that `html5test.o.o` "looks good" (which might be why you call it "working"), but it still requests the same non-existing file as it did when I opened this ticket.
