- Status changed from New to Rejected
- Assignee set to SLindoMansilla
- Target version set to Milestone 30

Not reproducible since 18 days: https://openqa.opensuse.org/tests/1369059#next_previous

#5 - 2020-09-03 14:31 - dimstar
- Status changed from Rejected to New

Happens again: https://openqa.opensuse.org/tests/1381541#step/gdal/4

The issue seems actually be the module running in front of gdal, i.e. wpa_supplicant.
