#### History

##### #1 - 2020-04-22 10:30 - geor

I would really like to see this feature! It would help a lot with test design.

A feature that could also tie nicely to this one would be: being able to see the tests that contain a specific perl module.

##### #2 - 2020-04-22 11:48 - okurz

- Is duplicate of action #34486: database of "test cases" or how to search for tests we have in openQA added

##### #3 - 2020-04-22 11:50 - okurz

- Status changed from New to Rejected

- Assignee set to okurz

I am glad you came up with this. I see this ticket as a duplicate of the already existing feature request [#34486](#).

[https://progress.opensuse.org/issues/34486?issue\\_count=3&issue\\_position=2&next\\_issue\\_id=29925&prev\\_issue\\_id=53402#Suggestion](https://progress.opensuse.org/issues/34486?issue_count=3&issue_position=2&next_issue_id=29925&prev_issue_id=53402#Suggestion) mentions some approaches that can already be taken by you and other users to find out which jobs contain a "test". Please be aware of the ambiguity of the word "test" here. <http://open.qa/docs/#concepts> has a complete definition within the openQA context.
