Difficulty:			

Description

Observation

openQA test in scenario microos-15.2-DVD-x86_64-microos_textmode@64bit-2G fails in [transactional_update](#)

IIUC the test expects some update-test repo? Do I need to set something up specifically for MicroOS?

Test suite description

microOS system role test, with textmode

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2020-07-30 10:47 - SLindoMansilla

- Subject changed from need update-test repo for microos to [functional][y] need update-test repo for microos

#2 - 2020-08-04 09:32 - riafarov

- Status changed from New to Resolved

- Assignee set to riafarov

Original issue was resolved before me, I've fixed needle issue in the latest run, so it works fine now:
