

openQA Tests - action #66358

[qe-sap][sles4sap] Tests specified with machine 2G but the test specifies 32G . This is not the way tests are intended to run and multiple jobs incomplete

2020-05-03 20:18 - okurz

Status:	New	Start date:	2020-05-03
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:			
Difficulty:			
Description			
Observation			
See for example https://openqa.suse.de/tests/4186410 incompleting on powerqaworker-qam-1 or https://openqa.suse.de/tests/4186470 on QA-Power8-5-kvm . These tests are unlikely to work in a stable way. Please use "machines" in openQA properly and do not specify a custom value of memory on test suites. And I suggest to use dedicated machines to allocate this much amount of RAM as currently we can not scale up that easily.

I will create a MACHINE entry for this.

We don't have the possibility to use dedicated servers yet, mainly because we don't have Power8 servers. We are trying to have Power9 servers that we could dedicated for these "big" SAP tests, but a lot of work will be needed to adapt current KVM tests on PowerVM...

This ticket was set to "High" priority but was not updated within the SLO period for "High" tickets (30 days) as described on <https://progress.opensuse.org/projects/openqatests/wiki/Wiki#SLOs-service-level-objectives> . Please consider picking up this ticket within the next 30 days or just set the ticket to the next lower priority of "Normal" (SLO: updated within 365 days). This update was done as agreed within the SUSE QE Sync call 2021-09-01
