

qe-yast - action #66415

coordination # 36712 (New): [saga] Use YaST specific framework for GUI testing

coordination # 62726 (Closed): [functional][y][epic] Create separate Ruby Gem representing libyui Client API

[functional][y] Implement libyui_client widgets required to make test for expert partitioner

2020-05-05 07:24 - riafarov

Status:	Resolved	Start date:	2020-05-05
Priority:	Normal	Due date:	2020-06-16
Assignee:	JERiveraMoya	% Done:	0%
Category:		Estimated time:	8.00 hours
Target version:	future		
Description			
Motivation			
Unfortunately, it didn't quite worked with registration module as it opens software selection pages which we do not support as of now. Therefore we decided to extend supported widgets for the YaST partitioner, as it's one of the main components being used and we seem to have all the used widgets being covered.			
See https://github.com/jknphy/libyui_client/pull/8 as an example			
Acceptance criteria			
1. libyui client supports YTree, YTable and YMenuButton widgets			
2. Unit tests cover newly introduced methods			

History

#1 - 2020-05-06 08:37 - riafarov

- Description updated
- Due date changed from 2020-05-19 to 2020-06-02
- Status changed from New to Workable
- Estimated time set to 8.00 h

- Assignee set to JERiveraMoya

#3 - 2020-05-26 13:16 - JERiveraMoya

- Status changed from Workable to In Progress

Noticed a few problems while implementing new widgets:

- Selection of rows does not work as expected when rows are displayed in different order that are represented in JSON -> [#67393](#)
- LibYUI Embedded Webserver does not respond once YMenuButton is open, any endpoint is reachable not even URL http://:
- Not implemented yet support in server side for YCheckBoxFrame -> [#67396](#)
- Not implemented yet support in server side for YBarGraph, only displayed in qt and very useful to check unpartitioned space.
- Not implemented yet support in server side for YMultiSelectionBox, used for cloning partition layout.
