Estimated time: 42.00 hours

Description

Test fails in kdump_and_crash, because not enough disk space to install rpms

at least two occurrences of this problem

https://openqa.opensuse.org/tests/1262655#step/kdump_and_crash/22 (TW 20200509)
https://openqa.opensuse.org/tests/1265167#step/kdump_and_crash/22 (TW 20200512)

Do we need to:

- increase disk space of started "extra_tests_in_textmode" ? today 20GB (easiest solution)
- reduce number of modules before kdump_and_crash
- have some cleanup before kdump_and_crash rpms install (what/how ?)

Observation

openQA test in scenario opensuse-Tumbleweed-DVD-ppc64le-extra_tests_in_textmode@ppc64le fails in kdump_and_crash

Tasks

1. Need to determine the minimal requirements for disk space on ppc for textmode installation. (Ihno?)
2. Trigger 100 runs to see if reported problem (not enough space) reproducibility (at the moment we see switch root failure at boot, product bug)

Reproducible

Fails since (at least) Build 20200506

Expected result

Last good: 20200501 (or more recent)

Further details

Always latest result in this scenario: latest

History

#1 - 2020-08-14 11:50 - SLindoMansilla
- Subject changed from test fails in kdump_and_crash, because not enough disk space to install rpms to [u] test fails in kdump_and_crash, because not enough disk space to install rpms

Blocked by product bug: https://bugzilla.opensuse.org/show_bug.cgi?id=1172670

#4 - 2020-11-06 09:37 - tjyrinki_suse
- Subject changed from [u] test fails in kdump\_and\_crash, because not enough disk space to install rpms to [qe-core] test fails in kdump\_and\_crash, because not enough disk space to install rpms

#5 - 2021-03-12 12:50 - SLindoMansilla
- Status changed from Blocked to Resolved

Now blocked by another bug: https://bugzilla.opensuse.org/show_bug.cgi?id=1171055

But, I think this was already fixed. Someone will report the issue again if it happens.
