**Description**

**Observation**

https://openqa.suse.de/tests/4248040

Since this is a production issue related to GDM, we need a solution, so it's following test module won't get blocked.

**Suggestions**

- remove libqt5_qtbase from extra_tests_gnome_sdk.yaml temporarily until https://bugzilla.suse.com/show_bug.cgi?id=1171869 is resolved.
- or apply a workaround to soft-fail the module with https://bugzilla.suse.com/show_bug.cgi?id=1171869

**History**

#1 - 2020-05-22 07:31 - zluo
- Related to action #66301: [sles][functional][u]test fails in libqt5_qtbase added

#2 - 2020-05-25 09:24 - SLindoMansilla
- Description updated
- Status changed from New to Workable
- Target version set to Milestone 30
- Estimated time set to 42.00 h

#3 - 2020-05-28 08:06 - szarate
- Status changed from Workable to Resolved
- Assignee set to szarate

It is a bug. Producing a workaround for it, would be a waste of time: https://openqa.suse.de/tests/4285723#step/shutdown/9 see also my comment on the bug already mentioned.

Marking as resolved, due to the time invested in the investigation of the bug. Also to discuss during the review
