Target version:			
Description			
It's possible to use easysrsa in a batch mode, which means no requests during easysrsa jobs. This is a little dangerous but this would create the opportunity to do easysrsa jobs via the invis-Portal.			
A disadvantage is that we have to save the password of the ca-key in a file on the server.			
Feedback wanted!

Leider kein Feedback hier.

Ingo und ich sind uns telefonisch darüber einig, dass die Ablage des CA-Passworts auf dem Server zu riskant ist. Daher setzen wir das nicht um.
