Target version:	future		
Difficulty:			

Description

entry point	actions	descriptions
<i>test</i>	restart	restarts a test. Restarts the parent if the parent status is not success, or explicitly requested
	stop/cancel	stop/cancel tests that match certain conditions
	clone	clone a test from a host to another host.
	status	returns the status of a test (run, failed, softfailed, canceled)
	search	search for tests according to the inputs
	info	display several information regarding a test (details, settings, comments, previous results...)
<i>worker</i>	search	search for workers according to the inputs
	info	display several information regarding a worker (host, instance, properties, status...)
<i>group</i>	search	search for groups according to the inputs
	info	display several information regarding a group (name, tests, prio, arch, latest build results)
<i>build</i>	search	search for builds according to the inputs
	info	display build information (flavor, tests, archs, status)
	restart	restart tests that belongs to a build that match certain conditions
	new	create a new build according to the parameters passed (equivalent to the current "isos post")
