

qe-yast - action #68962

coordination # 42854 (Closed): [functional][y][epic] Introduce relevant installation validation test modules

[functional][y] Add validation to cryptlvm+activate_existing scenario

2020-07-14 14:48 - riafarov

Status:	Resolved	Start date:	2020-07-14
Priority:	Normal	Due date:	2020-07-28
Assignee:	oorlov	% Done:	0%
Category:		Estimated time:	5.00 hours
Target version:	SLE 15 SP3		
Description			
See motivation in the parent ticket.			
This scenario is special about enabling encrypted partitions. It doesn't make sense to validate this after installation is conducted, as disk will be wiped out. Nevertheless, we can check that disk is activated and existing partition are activated.			
We might have issues with switching consoles on powerVM, fixing it is out of scope of this ticket and in this case we should create follow up task.			
Acceptance criteria			
1. Activation of the encrypted partitions is validated 2. Test plan is updated accordingly			

History

#1 - 2020-07-15 08:49 - riafarov

- Description updated

- Estimated time set to 5.00 h

#2 - 2020-07-15 09:07 - riafarov

- Status changed from New to Workable

#3 - 2020-07-17 09:57 - oorlov

- Assignee set to oorlov
