

openQA Project - action #69244

Need to rebuild the video codecs after update the system packages

2020-07-22 14:37 - ilausuch

Status:	Resolved	Start date:	2020-07-22
Priority:	Normal	Due date:	2020-07-29
Assignee:	okurz	% Done:	0%
Category:	Support	Estimated time:	0.00 hour
Target version:			
Difficulty:			

Description

In Tumbleweed, after updating the system using
sudo zypper dup --allow-vendor-change

All the jobs stopped with this error:

Likely error from autoinst-log.txt:

```

```

After rebuild the os-autoinst codecs this worked again

```
cd /hdd/openqa-devel/repos/os-autoinst
make clean
./autogen.sh
make
```

hm, ok. I don't think this is a bug we can solve. It only concerns the development environment where you need to build the project yourself. Any sane operating system uses a build system that properly handles the dependencies. E.g. the Open Build Service that builds os-autoinst rebuilds os-autoinst whenever any of its dependencies change. This is the same for virtually any software with dependencies. I do not even think it makes sense to describe that in the documentation of os-autoinst because that is just the same for all software. Ok with the explanation and closing the ticket?
