Category:	Feature requests	Estimated time:	0.00 hour
Target version:	Ready		
Difficulty:	easy		

Description

Observation

Previously I was able to delete the expiration date when creating API key. This seems to not work anymore in both Firefox and Chromium but it was never obvious that it is possible.

Acceptance criteria

- **AC1:** It is possible to create API keys without expiration over the UI
- **AC2:** It is obvious to the user that no expiration is a possibility

Suggestions

- Add a test for this
- Allow to set no expiration, e.g. by allowing to delete the date from the entry field or even make that more explicit
- Test manually with usual browsers
