openQA Project - action #69946

[tools] when needle does not exist, test is paused until MAX_JOB_TIME

2020-08-12 18:15 - dzedro

Status:	Rejected		**Start date:**	2020-08-12
Priority:	Normal		**Due date:**	
Assignee:	okurz		**% Done:**	0%
Category:	Concrete Bugs		**Estimated time:**	0.00 hour
Target version:	Ready			
Difficulty:				

Description

Observation

Test should not be paused [1] when the needle does not exist, jobs is then hanging (in this case 3 hours) until timeout_exceeded.

```
[2020-08-12T13:21:39.887 CEST] [debug] <<< testapi::check_screen(mustmatch="yast2-lan-really", tim
eout=3)

openQA test in scenario sle-15-SP2-Desktop-DVD-Incidents-x86_64-qam-allpatterns@64bit fails in yast2_lan

Test suite description

Default system config with all patterns enabled.
Due changes in autoyast profile size of HDD increased to 40GB

Reproducible

Fails since (at least) Build :16068:freerdp

Expected result

Last good: :16063:emacs (or more recent)

Further details

Always latest result in this scenario: latest

History

#1 - 2020-10-09 07:53 - okurz

- Project changed from openQA Tests to openQA Project

- Category changed from Bugs in existing tests to Concrete Bugs

- Status changed from New to Rejected

- Assignee set to okurz

- Target version set to Ready

Hi dzedro , I saw you added the "[tools]" keyword in the ticket. We within the SUSE QA Tools team struggle a bit to review tickets with this keyword as we primarily look into the project progress.opensuse.org/projects/openqav3/ .

If this really is the case then it's certainly unexpected behaviour. From the log it looks like that the test was paused from the developer mode or with a setting PAUSE_AT. The full job does not exist anymore unfortunately so I can't check vars.json as well. Later jobs in this scenario do look fine however. Please report back if you see this again.
