This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: upgrade_Leap_42.3_kde
<https://openqa.opensuse.org/tests/1390406>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed

- Status changed from New to Closed

The 42.x -> TW upgrades test have been given up on. They were too unstable for openQA to handle. As such, this ticket is no longer relevant.
