| Revert https://gitlab.suse.de/qs-f/y/qa-sle-functional-y/-/merge_requests/266/diffs and make sure that tests pass as they fail in the current build 14.2 | | | |
| Main hint is parameters mismatch, so might be that we have missing settings in the test suite to make it work on those backends. | | | |

Tests were never executed there and on svirt it would be tricky to trigger them. Rejecting. Feel free to reopen if you meant something else here. Thanks!

Comment above is wrong and we had it running before:

<https://openqa.suse.de/tests/overview?arch=&machine=&modules=mediacheck&distri=sle&version=15-SP2&build=205.1&groupid=129#>

So it's recent regression.
