Description

User story

Create one test suite with 'HDD_1_URL=xxx' and add it to a job group, when doing 'isos post' to trigger the job group's jobs, all jobs are blocked by this download gru task.
https://progress.opensuse.org/issues/62159#note-29

Acceptance criteria

AC: The download gru task only blocks its related job.

Seems like we need to track the list of relevant job IDs individually for each download. Sorry that I've overlooked that "detail" when suggesting the approach - but I guess it shouldn't be too hard to extend it as we already track multiple destinations per download.

PR: https://github.com/os-autoinst/openQA/pull/3377

#6 - 2020-09-16 08:51 - Xiaojing_liu

- Status changed from In Progress to Feedback

#7 - 2020-09-25 02:14 - Xiaojing_liu

- Status changed from Feedback to Resolved

The PR has been deployed on OSD and o3 for a few days. No regression issue is reported, so I prefer to set this ticket to Resolved. If there is anything problem, we could reopen it.
