[y] Validate updated package version with self_update

2020-09-07 07:33 - ybonatakis

Status:	New	Start date:	2020-09-07
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	future		

Description

With the work on https://bugzilla.suse.com/show_bug.cgi?id=1175614 done, we can check what version the self update download and use in the inst-sys. Rodion has already created validation module tests/installation/validate_self_update.pm checking that the feature attempts to download some packages from the update repo but it does not check/compare the package version between the default inst-sys and the update repo. The inst-sys stores the package version in /.packages.root. With yast2-installation-4.3.16 and above we should find /.packages.self_update file which we can use to compare

History

#1 - 2020-09-07 07:33 - ybonatakis

- Subject changed from [y] Validate updated packages with self_update to [y] Validate updated package version with self_update

#2 - 2020-09-16 07:53 - riafarov

- Category set to Enhancement to existing tests

- Target version set to future

#3 - 2020-09-29 16:31 - ybonatakis

- File packages.self_update.png added

```

#4 - 2020-10-20 14:23 - riafarov

- Project changed from openQA Tests to qe-yast

- Category deleted (Enhancement to existing tests)

#5 - 2021-10-20 07:59 - okurz

This ticket was set to "Normal" priority but was not updated within the SLO period for "Normal" tickets (365 days) as described on <https://progress.opensuse.org/projects/openqatests/wiki/Wiki#SLOs-service-level-objectives>

first reminder: Please consider picking up this ticket within the next 365 days or just set the ticket to the next lower priority of "Low" (no SLO related time period).

#6 - 2021-10-21 09:46 - ybonatakis

- *Priority changed from Normal to Low*

lets make is Low as the yast team is focusing in other things atm
