History

#1 - 2020-09-30 09:40 - okurz

- Copied to action #72130: check and/or reduce runtime of t/api/04-jobs.t added

#2 - 2020-09-30 10:36 - okurz

- Status changed from In Progress to Feedback

I could reproduce the problem locally, e.g. from lord.arch:

```
t/44-scripts.t ..
ok 1 - Calling 'client --help' returns exit code 0
ok 2 - Calling 'create_admin --help' returns exit code 0
ok 3 - Calling 'dump_templates --help' returns exit code 0
ok 4 - Calling 'initdb --help' returns exit code 0
ok 5 - Calling 'load_templates --help' returns exit code 0
ok 6 - Calling 'modify_needle --help' returns exit code 0
ok 7 - Calling 'openqa --help' returns exit code 0
ok 8 - Calling 'openqa-cli --help' returns exit code 0
ok 9 - Calling 'openqa-clone-job --help' returns exit code 0
ok 10 - Calling 'openqa-label-all --help' returns exit code 0
ok 11 - Calling 'openqa-livehandler --help' returns exit code 0
ok 12 - Calling 'openqa-scheduler --help' returns exit code 0
ok 13 - Calling 'openqa-validate-yaml --help' returns exit code 0
ok 14 - Calling 'openqa-websockets --help' returns exit code 0
ok 15 - Calling 'openqa-workercache --help' returns exit code 0
Bailout called. Further testing stopped: test exceeds runtime limit of '20' seconds
Bail out! test exceeds runtime limit of '20' seconds
FAILED--Further testing stopped: test exceeds runtime limit of '20' seconds
## count_fail_ratio: Run: 5. Fails: 5. Fail ratio 100%
```

Prepared <https://github.com/os-autoinst/openQA/pull/3435> to cover this for now with higher timeout. In general it is unfortunate that our scripts take that long already to just show a "--help" screen. This is something that could be improved.

#3 - 2020-10-02 09:11 - okurz

- Copied to action #72199: check and reduce runtime of t/44-scripts.t added

#4 - 2020-10-02 09:13 - okurz

- Status changed from Feedback to Resolved

<https://github.com/os-autoinst/openQA/pull/3435> merged so that the timeout is not hit. Created [#72199](#) to bring down the runtime.
