Target version:	future		
Difficulty:			
Description			
Observation			
While trying to install openQA-worker on a SLE15-SP2 (aarch64) system, I get the following problem:			
<pre>Problem: nothing provides perl(Minion::Backend::SQLite) >= 5.0.1 needed by openQA-worker-4.6.16016 53074.e8470f0ab-3213.1.noarch</pre>			
This is because it is unresolvable: https://build.opensuse.org/package/show/devel:openQA:SLE-15/perl-Minion-Backend-SQLite Because:			
<pre>nothing provides perl(Moo) >= 2.000001 needed by perl-SQL-Abstract</pre>			
perl-Moo being unresolvable as well: https://build.opensuse.org/package/show/devel:openQA:SLE-15/perl-Moo			
<pre>nothing provides perl(Role::Tiny) >= 2.001004, (got version 2.000006 provided by perl-Role-Tiny), nothing provides perl(Sub::Defer) >= 2.006006, (got version 2.004000 provided by perl-Sub-Quote), nothing provides perl(Sub::Quote) >= 2.006006, (got version 2.004000 provided by perl-Sub-Quote)</pre>			
Workaround			
See #72229#note-3 or run openSUSE Leap or Tumbleweed container on the SLE systems1

Using an old openQA-worker from Backports workarounds the installation problem, but that would be much better to use an up-to-date openQA/os-autoinst code.

- Project changed from openQA Tests to openQA Project

- Subject changed from perl(Minion::Backend::SQLite) >= 5.0.1 missing for openQA-worker for SLE15-SP2 to Support openQA worker on SLE15-SP2 (aarch64): perl(Minion::Backend::SQLite) >= 5.0.1 missing for openQA-worker for SLE15-SP2

- Description updated

- Category set to Feature requests

- *Priority changed from High to Low*

- *Target version set to future*

Unfortunately we don't have the personnel to support SLE packages right now. You are welcome to provide SRs if you know what fixes it or suggest us to link specific tickets and such. However I recommend you use openSUSE Leap or Tumbleweed. You can run a worker from containers easily on SLE though

#6 - 2020-10-05 09:31 - ggardet_arm

Could you please link perl-Sub-Quote and perl-Role-Tiny from Factory to devel:openQA:SLE-15?

#7 - 2020-10-05 09:34 - okurz

- *Status changed from New to Feedback*

- *Assignee set to okurz*

did for i in perl-Sub-Quote perl-Role-Tiny ; do osc linkpac openSUSE:Factory \$i devel:openQA:SLE-15; done now and monitoring progress on the project.
