

openQA Project - action #73156

coordination # 71926 (Workable): [epic] t/14-grutasks.t takes multiple minutes within circleCI, only 6s locally (but errors but still succeeds?), and no log output visible in circleCI

test not failing but error showing up t/25-downloader.t: "Cannot determine file type for '/tmp/DptzoOZjyt/test'"

Acceptance criteria

- **AC1:** No unhandled output in non-verbose output shown in t/5-downloader.t

Suggestions

- If any messages are expected, catch them with Test::Output, otherwise prevent them (or even better fail tests if there is any unexpected output)
