Difficulty:	

Description

Observation

openQA test in scenario sle-15-SP2-Server-DVD-Incidents-Install-x86_64-qam-incidentinstall@64bit fails in [update_install](#)

This failure is due to incorrect parsing of the patch conflicts. The regex extracting the conflicting elements fails when the package name includes the . character or when one of the conflicting elements doesn't have a file extension.

Test suite description

Incident Installation TEST
MAX_JOB_TIME=9000 due to long texlive update

Reproducible

Fails since (at least) Build [:13024:bind](#)
The

Expected result

Last good: [:16697:yast2-mail](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)
