Description

Observation

See https://gitlab.suse.de/openqa/salt-states-openqa/-/merge_requests/379 after merge this did not trigger a pipeline run. Maybe we lost something in https://gitlab.suse.de/openqa/salt-states-openqa/-/merge_requests/347 ? But it does not look like it could explain it.

Workaround

Trigger CI pipeline manually in <https://gitlab.suse.de/openqa/salt-states-openqa/-/pipelines/new> or fetch git repo update on osd in /srv/salt manually and apply.

History

#1 - 2020-10-14 10:08 - okurz

- Description updated

#2 - 2020-10-15 11:39 - okurz

https://gitlab.suse.de/openqa/salt-states-openqa/-/merge_requests/381 is a MR from mkittler which when merged by me did the same. So at least it is not just because of MRs from me :)

#3 - 2020-10-15 14:27 - okurz

- Status changed from New to Blocked

- Assignee set to okurz

Since some days, probably since a change within the gitlab.nue.suse.com infrastructure merging merge requests on gitlab.nue.suse.com does not trigger pipelines anymore. I reported this initially here assuming it was my problem but José Gómez @josegomezr and Farah Schueller [farahschueller](#) have reported the same issue, see <https://chat.suse.de/channel/suse-it-ama?msg=n4cMms9qwch78TfWp> and following. I have now reported <https://infra.nue.suse.com/SelfService/Display.html?id=178470>

#4 - 2020-10-22 11:12 - okurz

- Status changed from Blocked to Resolved

the ticket has received no update yet but a new version of gitlab was installed. And rklein mentioned in <https://chat.suse.de/channel/suse-it-ama?msg=zEqnXdASx2BxuJ97Z> that the issue should be gone. I updated <https://infra.nue.suse.com/SelfService/Display.html?id=178470> . I just merged https://gitlab.suse.de/openqa/salt-states-openqa/-/merge_requests/386 and it triggered a gitlab CI pipeline as expected.
