qe-yast - action #73474

coordination # 69130 (Closed): [functional][y][epic] Extend test coverage for firstboot

Add more modules to yast2_firstboot

2020-10-18 12:17 - syrianidou_sofia

Status:	Closed		**Start date:**	2020-10-18
Priority:	Normal		**Due date:**	
Assignee:	JRivrain		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:	SLE 15 SP3			

Description

In order to extend coverage for yast2-firstboot , we can modify the yast2-firstboot configuration files of the relevant test suite:
https://openqa.suse.de/tests/4840750

There already is customized file replacing /etc/YaST2/firstboot.xml after merge of:
https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/10856

We should re-use yast2_firstboot_custom and use non-default settings for the modules if those are allowed.

Enable firstboot_ntp, firstboot_keyboard and inst_lan modules.

- Status changed from Blocked to New

For inst_lan, use skip_detection:

```
<arguments>
    <skip_detection config:type="boolean">true</skip_detection>
</arguments>
```

https://github.com/yast/yast-network/blob/b3c7b5f27c7aff1d93d99dec37fb485563302dcd/src/lib/network/clients/inst_lan.rb#L28-L47

#3 - 2021-02-09 09:57 - riafarov

- Description updated

- Status changed from New to Workable

Please, do not work on it, until #73477 is finished/sync with Jonathan.

#5 - 2021-02-22 14:18 - riafarov

- Target version changed from future to SLE 15 SP3

#6 - 2021-03-11 15:54 - JRivrain

Spending more time, as I decided to use libyui and POM for firstboot. It's not the direct scope of this thicket, but I think it's worth it, see
https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12108.

I may not enable the keyboard client ATM because it's still affected by this: Keyboard layout module page UI in first boot is broken also I'm not sure
this client is very used, since there is already "language and keyboard" by default.

#7 - 2021-04-15 15:20 - JRivrain

Libyui enabled in firstboot, PR merged :https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12249 (replaces https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12108)

Adding new clients, waiting for review https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/12290
