

openQA Project - action #7476

Support comments in tests

2015-05-12 08:52 - coolo

Status: Resolved	Start date: 2015-05-12
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category: Feature requests	Estimated time: 0.00 hour
Target version:	
Difficulty:	
Description We need to add and edit one comment per test - preferably rich text to be able to add links to screenshots	
Related issues:

History

#1 - 2015-05-12 08:53 - coolo

I forgot to mention: the comments need to have a flag "outdated"

#2 - 2015-05-12 19:49 - oholecek

One comment only? As max. one comment?

#3 - 2015-05-13 04:38 - coolo

Perhaps we shouldn't call it comment - but one "fail reason description" per test :)

#4 - 2015-05-21 17:29 - coolo

In discussion with Ludwig and Anja, I got my mind changed and I added multiple comments per test. How to show that nicely per job group is still up to experiments.

#5 - 2015-05-22 13:32 - coolo

- Status changed from New to In Progress

- % Done changed from 0 to 60

<https://github.com/os-autoinst/openQA/pull/373> adds a database model and a start of the UI change.

What's left to do:

- write test cases
- hide comments - the database field is there, but that's it
- show job comments within the job group. right now only job group specific comments are displayed. I'm not so sure how it should look like, but you want to see what test the comment is from

#6 - 2015-06-16 15:20 - coolo

- Status changed from In Progress to Resolved

- Assignee set to coolo

#7 - 2016-01-17 11:43 - okurz

- Status changed from Resolved to Feedback

we have comments and we use them. But the view gets cluttered and many comments are incorrectly rendered and we can not correct them. In discussions I mentioned there should be a "fail reason description" which is exactly what coolo mentioned here

<https://progress.opensuse.org/issues/7476#note-3>

Can we please try to do this? E.g.

- have comments editable
- have a test description field, e.g. a field just below the "Overall summary" which we can edit to describe the current state, add bug links, describe

who is working on it, etc. (see <https://openqa.opensuse.org/tests/overview?distri=opensuse&version=Tumbleweed&build=20160116&groupid=1> for an example)

One might have remarks about "but we need an unchanged history" but

- I don't see a benefit of an "unchanged history" of broken comments. Without some hashsum we can never be sure anyway I did not mangle with the database
- With [#7478](#) we have a history of changes

#8 - 2016-01-17 11:44 - okurz

- Related to action #10212: labels and badges for builds added

#9 - 2016-01-17 11:45 - okurz

- Related to action #10148: better notification and user feedback added

#10 - 2016-01-20 09:28 - coolo

- Assignee changed from coolo to okurz

- Target version deleted (Sprint 17)

#11 - 2016-01-20 10:25 - RBrownSUSE

- Assignee deleted (okurz)

#12 - 2016-02-07 22:19 - okurz

- Status changed from Feedback to Resolved

- % Done changed from 60 to 100

ok, comments are not-editable because no one did it yet, not because of "political reasons" or similar. Work on "editable comments" is tracked in [#10622](#) so we can close the current issue again.
