

openQA Infrastructure - action #75277

enable "postfix" service again after #73633 resolved

2020-10-25 21:29 - okurz

Description			
I disabled postfix on some workers. This should be reenabled with something like: <pre>sudo salt -l error -C 'G@roles:worker' cmd.run 'sudo systemctl enable --now postfix'</pre> after #73633 is fixed and IPv6 routes are enabled again on all workers

History

#1 - 2020-10-25 21:29 - okurz

- Copied from action #75016: [osd-admins][alert] Failed systemd services alert (workers): os-autoinst-openvswitch.service (and var-lib-openqa-share.mount) on openqaworker-arm-2 and others added

#2 - 2020-11-20 11:59 - okurz

- Status changed from Blocked to Resolved

I did the above and then

```
salt -l error -C 'G@roles:worker' cmd.run 'sudo systemctl --failed --no-legend'
```

to crosscheck that no services failed.
