

openSUSE Leap 15.3 - action #76198

Setup release notes

2020-10-28 14:22 - lkocman

Status:	Resolved	Start date:	2020-12-31
Priority:	Normal	Due date:	
Assignee:	stfnknorr	% Done:	50%
Category:		Estimated time:	0.00 hour
Target version:	Alpha		

Description

A branch for new distribution needs to be created in the release notes git and the package adjusted accordingly.

The tokens for OBS are in the factory-maintainer user. Botmaster has all accounts:

```
sudo docker exec -ti go-agent-repo-checker-3 sudo -i -u go
```

Instructions how to set up webhooks:

https://openbuildservice.org/help/manuals/obs-user-guide/cha.obs.source_service.html#sec.obs.sserv.github.com

History

#1 - 2020-12-04 14:41 - lkocman

- Subject changed from Setup 15.2 release notes to Setup release notes

#2 - 2020-12-04 14:50 - lkocman

https://github.com/openSUSE/release-notes-openSUSE/tree/Leap_15.3

#3 - 2020-12-07 15:07 - lkocman

- Assignee set to stfnknorr

Agreed to re-assign issue to Stefan.

#4 - 2020-12-07 15:07 - lkocman

- Start date changed from 2020-10-28 to 2020-12-31

#5 - 2021-02-03 10:12 - stfnknorr

- Status changed from New to Resolved

I think this is done:

- Lubos created the branch and fixed version strings, etc. in ~December 2020.
- I kicked out some old content, set up a Weblate component for this and set up the OBS package, so we get automatic builds on doc.o.o.
- SR for initial package: <https://build.opensuse.org/request/show/868669>
