

openSUSE Leap 15.3 - action #76429

communicate submission for maintenance to maintenance

2020-10-28 14:23 - lkocman

Status:	Resolved	Start date:	2020-10-21
Priority:	Normal	Due date:	2021-06-02
Assignee:	lkocman	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	GM		
Description			
Some submission may not have made it into GM. Communicate to maintenance to submit them as update instead.			

History

#1 - 2021-05-14 16:25 - lkocman

- Start date changed from 2020-10-28 to 2020-10-21

This should be started once we have GM. Setting start date to 21st

#2 - 2021-05-20 15:06 - lkocman

- Assignee set to lkocman

#3 - 2021-05-31 18:12 - lkocman

- Due date set to 2021-06-02

- Status changed from New to Resolved

- % Done changed from 0 to 100

Hello openSUSE maintenance team,

we do have a task to communicate submissions that didn't make it to Leap 15.3 GM to maintenance team as part of <https://progress.opensuse.org/issues/76429>

https://build.opensuse.org/staging_workflows/openSUSE:Backports:SLE-15-SP3

Our current staging has following 3 SRs that were not unaccepted. We should figure out whether they can classify as maint update and resubmit them.

<https://build.opensuse.org/request/show/894804> (ComputeLibrary)
<https://build.opensuse.org/request/show/895076> (armnn)
<https://build.opensuse.org/request/show/894905> (tensorflow2)

There was a larger Adi with XFce, however I did notify Xfce team to resubmit requests, they told me that will do it. So there is nothing to do for the list below.

<https://build.opensuse.org/request/show/895060> (exo)
<https://build.opensuse.org/request/show/895063> (gigolo)
<https://build.opensuse.org/request/show/895058> (mousepad)
<https://build.opensuse.org/request/show/895056> (thunar)
<https://build.opensuse.org/request/show/895064> (xfce4-battery-plugin)
<https://build.opensuse.org/request/show/895062> (xfce4-clipman-plugin)
<https://build.opensuse.org/request/show/895073> (xfce4-cpufreq-plugin)
<https://build.opensuse.org/request/show/895071> (xfce4-cpugraph-plugin)
<https://build.opensuse.org/request/show/895066> (xfce4-netload-plugin)
<https://build.opensuse.org/request/show/895057> (xfce4-panel)
<https://build.opensuse.org/request/show/895070> (xfce4-panel-profiles)
<https://build.opensuse.org/request/show/895061> (xfce4-screenshooter)
<https://build.opensuse.org/request/show/895059> (xfce4-settings)
<https://build.opensuse.org/request/show/895065> (xfce4-systemload-plugin)

<https://build.opensuse.org/request/show/895068> (xfce4-time-out-plugin)
<https://build.opensuse.org/request/show/895067> (xfce4-xfsdashboard)

Thank you very much in advance

Lubos Kocman
