

openSUSE Leap 15.3 - action #76447

get rid of repochecker failures

2020-10-28 14:23 - lkocman

Status:	Resolved	Start date:	
Priority:	Normal	Due date:	2021-05-21
Assignee:	m1in7442	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	GM		
Description			
remaining repo checker failures need to be fixed: https://build.opensuse.org/package/view_file/openSUSE:Leap:15.1:Staging/dashboard/repo_checker Also, the whitelist should be reviewed if it lists too much

There is no repo_checker anymore but now was rebuildpacs. Leap 15.3's has no uninstalleable problem for x86_64, for Backports, https://build.opensuse.org/package/view_file/openSUSE:Backports:SLE-15-SP3:Staging/dashboard/rebuildpacs.openSUSE:Backports:SLE-15-SP3-standard.yaml?expand=1 we now only had one which regarding to branding

openSUSE:Backports:SLE-15-SP3/standard/x86_64/sddm:
problem:

- nothing provides sddm-theme-SLE needed by sddm-branding-SLE-0.18.0.x86_64
- nothing provides sddm-theme-openSUSE needed by sddm-branding-openSUSE-0.18.0.x86_64

We do rebuild sddm in Leap:15.3 already, therefore it isn't a problem for Leap 15.3. I think we can close this ticket.
