

openSUSE Leap 15.3 - action #76669

find external BT seeders

2020-10-28 14:23 - lkocman

Status:	Resolved	Start date:	2021-05-25
Priority:	Normal	Due date:	2021-06-02
Assignee:	bmwiedemann	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	GA		

Description

For future reference: .torrent files are added into pontifex:/var/lib/hefurd and the service needs a restart.

.torrent files can be pulled from mirrorbrain / via the download.o.o iso metalink page

ask for volunteers to seed

The below is old/outdated:

put torrent in separate directories

Torrents are created using /work/cd/bin/torrent-wrapper.pl

This requires make_torrent and dump_torrent from git/libtorrent/examples

To build: zypper in boost-devel libtorrent-rasterbar-devel libtorrent-devel

History

#1 - 2021-06-01 20:23 - lkocman

- Due date set to 2021-06-02

- Assignee set to bmwiedemann

- Start date changed from 2020-10-28 to 2021-05-25

I Believe this is already done by Bernhard

#2 - 2021-06-02 06:34 - bmwiedemann

- Status changed from New to Resolved

- % Done changed from 0 to 100

Yes, torrents are added and seeded.

The description also mentions restarting hefurd, but I found that this is not needed. Instead I did
hefurctl -add-torrent openSUSE-Leap-15.3-DVD-aarch64.iso.torrent

I skipped the ppc64 and s390x isos, as those would not see much traffic anyway.
