<b>Target version:</b>	future		
<b>Difficulty:</b>			

#### Description

### Motivation

OpenQA supports showing parent group name when getting a job's details, and the pr has been deployed on o3, will be deployed on OSD this week.

If a job belongs to a parent job group, the parent job group name and id will be shown. such as:

```
openqa-cli api --o3 jobs/1470855 --pretty
```

```
{
  "job" : {
    ... ..
    "group" : "Development Tumbleweed",
    "group_id" : 38,
    "has_parents" : 0,
    "id" : 1470855,
    "name" : "opensuse-Tumbleweed-DVD-x86_64-Build20201113-create_hdd_textmode_ext4@uefi",
    "parent_group" : "Development",
    "parent_group_id" : 6,
  },
}
```

### Acceptance criteria

- **AC1:** All jobs below the parent job group "Development" are ignored regardless if "Development" is in the name of the child job group itself

### Suggestion

maybe we could use the parent group name to check if a job belongs to Development in <https://gitlab.suse.de/qa-maintenance/openQABot/-/blob/master/openqabot/utlis.py#L127>

##### #3 - 2020-11-26 12:25 - tjyrinki\_suse

- Project changed from QAM to openQA Tests

- Target version changed from QAM tests - future to Ready

openQABot is handled by the new joint QE Tools team.

**#4 - 2020-11-26 15:57 - okurz**

- Tags set to openQABot, python
- Subject changed from [openQABot]OpenQA supports showing parent group name when getting a job details to [openQABot] openQA supports showing parent group name when getting a job details
- Description updated
- Category set to Infrastructure
- Status changed from New to Workable

correct, thx

**#5 - 2020-12-09 15:19 - mkittler**

I would have almost picked up this ticket but the repository doesn't contain any instructions how to run an test this bot locally. There's not even an explanation what this bot is supposed to do.

**#7 - 2021-02-01 09:46 - cdywan**

Since with #80194 the code might be quite different, I'm setting this ticket to *Blocked* after discussing it with @osukup. The use case is still valid but it wouldn't make much sense to work on right now.

**#8 - 2021-02-01 09:46 - cdywan**

- Status changed from Workable to Blocked

**#9 - 2021-02-01 21:15 - okurz**

- Status changed from Blocked to New
- Priority changed from Normal to Low
- Target version changed from Ready to future

makes sense but we should have only "Blocked" with an assignee. However in this case I think we can go with "New"+"Low"+"future" and not have it on the backlog for "right now" at all :)
