

qe-yast - action #80204

coordination # 76861 (Closed): Adjust test code for the new partitioner UI

Adjust lvm+resize_root scenario for the UI changes in the Expert Partitioner

2020-11-23 10:17 - syrianidou_sofia

Status:	Closed	Start date:	2020-11-23
Priority:	High	Due date:	
Assignee:	riafarov	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	SLE 15 SP3		

Description

Observation

We have `resize_partition` method available now, but we might need to change some code to call it with expected parameters.

Test is executed with SLE 15 SP1 QU image:

https://openqa.suse.de/tests/latest?arch=x86_64&distri=sle&flavor=Installer-DVD-QR&machine=64bit&test=lvm%2Bresize_root&version=15-SP1

So please make sure that this still works.

openQA test in scenario `sle-15-SP3-Online-x86_64-lvm+resize_root@64bit` fails in [partitioning_resize_root](#)

Test suite description

Maintainer: okurz

Select LVM during installation and try to resize the root LV to span more than 40GB which is selected as default. See [bsc#989976](#), [bsc#1000165](#)

Reproducible

Fails since (at least) Build [85.2](#)

Expected result

Last good: [78.1](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2020-11-23 10:21 - syrianidou_sofia

- Subject changed from `Adjust partitioning_resize_root` module, using `libyui REST API` to `Adjust lvm+resize_root` scenario, using `libyui REST API`

#2 - 2020-11-23 10:28 - syrianidou_sofia

- Subject changed from `Adjust lvm+resize_root` scenario, using `libyui REST API` to `Adjust lvm+resize_root` scenario for the UI changes in the Expert Partitioner

#3 - 2020-11-23 13:04 - syrianidou_sofia

- Project changed from `openQA Tests` to `qe-yast`

- Category deleted (`Bugs in existing tests`)

#4 - 2020-11-24 13:53 - riararov

- Target version set to SLE 15 SP3
- Parent task set to #76861

#5 - 2020-12-01 09:55 - riafarov

- Status changed from New to Blocked
- Assignee set to riafarov

Methods needed here are implemented, so blocking and see if extra actions are required.

#6 - 2020-12-02 12:24 - riafarov

- Description updated
- Status changed from Blocked to Workable
- Assignee deleted (riafarov)

#7 - 2020-12-02 12:48 - riafarov

- Status changed from Workable to In Progress
- Assignee set to riafarov

Grabing this one as I've modified validation module here: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/11531>

Which will break SLE 15 SP1 test unless is adjusted along with SP3.

#8 - 2020-12-04 07:53 - riafarov

- Status changed from In Progress to Feedback

#9 - 2020-12-07 09:38 - riafarov

- Status changed from Feedback to Closed
