Description			
Commit b391b84490214cfd27387353a5bd18fba1d8e2fe (Adjust qemu backend scheduled for RAID0/1/5/6/10 scenarios) added setup_libyui which fails on 15SP1 on aarch64: https://openqa.suse.de/tests/overview?distri=sle&version=15-SP1&build=47.3&groupid=249 https://openqa.suse.de/tests/5060842 The test is part of the QU5 validation being done today. Note: There is no more QUs to 15SP1 after QU5, possibly finalized today, so this ticket is more for information. Trying to run with customs schedule now.

Ok, seems that I have opened wrong tab, test suite config was wrong somehow, fix is provided here:
