ns3.opensuse.org reports wrong IP to meet.opensuse.org

2020-11-25 09:58 - tjrinki_suse

Status:	Rejected	Start date:	2020-11-25
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
<p>The new meet.o.o server was put into place, and it's at 195.135.221.174. However, ns3.opensuse.org disagrees and reports 173, which breaks meet.o.o for everyone (unless using direct IP).</p> <p>Meanwhile, ns2 and ns4 are also down, possibly something to look at as well and verify if they'll eventually agree on the IP of meet.o.o.</p> <p>-Timo</p>			

History

#1 - 2020-11-25 10:40 - pjessen

- Status changed from New to Rejected
- Private changed from Yes to No
