

openQA Project - action #80492

[easy] API help document says "Deletes ..." for routes like "test_suites/:id" PUT and POST and looks inconsistent

2020-11-27 06:04 - okurz

Status:	Resolved	Start date:	2020-11-27
Priority:	Normal	Due date:	2020-12-12

Target version:	Ready		
Difficulty:	easy		

Description

Observation

On https://openqa.opensuse.org/not_found one sees

```
+ /test_suites/:id      PUT      test_suitesid  Deletes a table ...
```

Problems

- It says "delete" for the PUT method, also POST
- there is no "apiv1_..." in the route name
- Looks like the same text is put on all methods here
- Maybe same problem appears for other routes

Suggestions

- Find the route definitions in <https://github.com/os-autoinst/openQA/blob/master/lib/OpenQA/WebAPI.pm#L389>
- Crosscheck and correct the "name" parameter
- Correct the comment that is defined in lib/OpenQA/WebAPI/Controller/API/V1/Table.pm and either incorrectly read out or needs to be updated. likely the method "_verify_table_usage" has just in the middle between the correct comment for "update" and the method definition it self

History

#5 - 2020-11-28 20:46 - okurz

- Due date set to 2020-12-12

Setting due date based on mean cycle time of SUSE QE Tools

#6 - 2020-12-02 09:10 - okurz

I see that +/test_suites/:id PUT "apiv1_put_test_suite" is on https://openqa.opensuse.org/foo_bar but also +/test_suites POST test_suites . same for "machines", Shouldn't this be "apiv1_post_test_suites" and "apiv1_post_machines"?

#7 - 2020-12-02 09:26 - mkittler

- *Status changed from In Progress to Feedback*

PR has been merged. I see apiv1_post_test_suite and apiv1_post_machine on the 404 page. Not sure what you mean.

#8 - 2020-12-04 11:38 - mkittler

- *Status changed from Feedback to Resolved*

The problem this ticket is about is solved. I created another PR for improving the 404 page a little bit more:

<https://github.com/os-autoinst/openQA/pull/3617>
