Description			
Ideas			
<ul style="list-style-type: none">• Simple enlarge storage space for "results" on our production instances (which is also a test for scalability) -> #77890• Setup additional storage (server) for old results<ul style="list-style-type: none">◦ Use overlays to make archived results appear alongside the regular results◦ Move old results at some point from the regular web UI host to the external storage (server), e.g. automatically via a Minion job◦ Mark jobs with archived results as such			
Subtasks:			
action # 69577: Handle installation of the new "Storage Server"			Resolved
action # 77890: [easy] Extend OSD storage space for "results" to make bug investigation...			Feedback
action # 88546: Make use of the new "Storage Server", e.g. complete OSD backup			New
