Description

Observation

openQA test in scenario opensuse-Staging:J-Staging-DVD-x86_64-gnome@64bit fails in [yast2_lan](#)

yast2_lan is amongst the tests that are failing most often in stagings; In almost all cases, a rerun of the test solves the issue (very rarely two reruns are needed)

It would be good to verify that this test passes reliably

Test suite description

Reproducible

Fails since (at least) Build [J.326.1](#) (current job)

Expected result

Last good: [J.325.1](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2020-12-04 07:45 - tjrinki_suse

- Subject changed from test fails in yast2_lan to [qe-core][opensuse][sporadic] test fails in yast2_lan
- Status changed from New to Workable
- Priority changed from Normal to High
- Start date deleted (2020-12-01)

Likely longer wait needed to get past Initializing Network Configuration

[tjrinki_suse](#)

I think QE YaST team is responsible for yast2_lan module.

#3 - 2020-12-15 13:19 - tjrinki_suse

- Project changed from openQA Tests to qe-yam
- Category deleted (Bugs in existing tests)
- Status changed from Workable to New
- Priority changed from High to Normal

Right, anyway probably longer wait would be worth testing. Moving and resetting status.
