

openQA Project - action #8084

show source of imported modules

2015-07-01 15:54 - Inussel

Status:	New	Start date:	2015-07-01
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Feature requests	Estimated time:	0.00 hour
Target version:	future		
Difficulty:			
Description			
more and more tests use 'use ...' and 'use base ...' and the code of those is not visible. grep source for those statements in webui and show the code.

History

#1 - 2015-11-17 13:08 - mlin7442

if no one here, I want to pick this one up. Idea is made it being like <http://lxr.free-electrons.com/source/block/blk-exec.c> , so 'XXX' will be a hyperlink at use 'XXX' statement, will check how hard/to do that with codemirror.

#2 - 2015-11-17 13:11 - coolo

- Status changed from New to In Progress

- Assignee set to mlin7442

<http://stackoverflow.com/questions/26933344/codemirror-detect-and-create-links-inside-editor> - the answer is from the codemirror maintainer, so no guessing involved :)

#3 - 2017-01-17 15:03 - coolo

- Assignee deleted (mlin7442)

let's put it back into the backlog

#4 - 2017-11-17 10:15 - coolo

- Status changed from In Progress to New

- Target version set to future

#5 - 2018-06-15 19:07 - okurz

- Target version changed from future to future

#6 - 2019-06-20 16:01 - okurz

- Category changed from 124 to Feature requests

#7 - 2019-10-17 18:25 - okurz

- Related to action #10192: Improve source code window added

#8 - 2020-07-28 10:42 - okurz

- Priority changed from Normal to Low

For tests running from a custom git refs spec we already use an approach pointing to according files on github. This can make exploring files from the github web UI very easy. I recommend we go the route of making everything fully VCS aware with [#58184](#) first to cover all other test jobs.
