

openQA Tests - action #80976

[qem][maint][evince] test fails in evince_* - the rendering of documents in evince has changed

2020-12-10 12:50 - vsvecova

Status:	Blocked	Start date:	2020-12-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:			
Difficulty:			

Description

Observation

In evince_view, the document does not expand to the expected fullscreen view:

https://openqa.suse.de/tests/5155437#step/evince_view/4

In evince_open, the document at 100 % seems to be significantly smaller than it used to be. It would be helpful to investigate whether this change is expected, or maybe owing to the display settings, change in the document, or whether it is wrong altogether.

https://openqa.suse.de/tests/5155437#step/evince_open/4.

Similar changes were observed in evince_rotate_zoom and evince_find:

https://openqa.suse.de/tests/5155437#step/evince_rotate_zoom/5, https://openqa.suse.de/tests/5155437#step/evince_find/5

Needles in these three modules have been adjusted though, as the functionality remained unchanged and working.

openQA test in scenario sle-15-SP2-Desktop-DVD-Updates-x86_64-qam-regression-documentation@64bit fails in [evince_view](#)

Test suite description

Reproducible

Fails since (at least) Build [20201210-1](#)

Expected result

Last good: [20201209-2](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: wayland-desktopapps-documentation

<https://openqa.suse.de/tests/5212688>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed
