Target version: future	
Difficulty:	
Description	
Observation	
https://openqa.suse.de/tests/5160751/file/autoinst-log.txt shows	
<pre>[0m[37m[2020-12-11T14:16:47.868 CET] [debug] EVENT {"event":"RESUME","timestamp":{"microseconds":867866,"seconds":1607692607}} [0m[1;34m[2020-12-11T14:16:47.901 CET] [debug] starting window_system tests/x11/window_system.pm [0m[37m[2020-12-11T14:16:47.913 CET] [debug] Backend process died, backend errors are reported below in the following lines: Encoder not accepting data: Broken pipe at /usr/lib/os-autoinst/backend/baseclass.pm line 157.</pre>	
but the video is stored at the job.	
Steps to reproduce	
Find jobs referencing this ticket with the help of https://raw.githubusercontent.com/os-autoinst/scripts/master/openqa-query-for-job-label , call openqa-query-for-job-label poo#81002	
Workaround	
likely sporadic and very seldom, retrigger the job
