Target version:	Ready			
Difficulty:				

Description

See Request 855720. From the build log I was able to extract the following failures:

```
not ok 762 - no (unexpected) warnings (via done_testing)

# Subtest: error pages shown for OpenQA::WebAPI::Controller::Step
not ok 3 - no (unexpected) warnings (via done_testing)

not ok 29 - short test URLs are supported the same # TODO not implemented
[  711s] #   Failed (TODO) test 'short test URLs are supported the same'
[  711s] #   at ./t/40-script_openqa-clone-custom-git-refspec.t line 93.
[  711s] # STDOUT & STDERR:

- Project changed from openQA Infrastructure to openQA Project

- Category set to Concrete Bugs

- Status changed from New to In Progress

moving to "openQA Project" as everyone could solve this. This is about the public packages that we provide, not only (internal) infrastructure. General rule: "If Adam Williamson or Guillaume Gardet could in theory solve the ticket, it's part of openQA Project" :)

#5 - 2020-12-17 04:07 - openqa_review

- Due date set to 2020-12-31

Setting due date based on mean cycle time of SUSE QE Tools

#6 - 2020-12-17 12:42 - mkittler

- Status changed from In Progress to Resolved

The PR (https://github.com/os-autoinst/openQA/pull/3644) has been merged and builds for Factory succeed again. The build should pass in the openSUSE:Factory project again if the fixed openQA version is submitted. There's already https://bugzilla.opensuse.org/show_bug.cgi?id=1180048 so I'm closing this issue here.
