Description

Observation

openQA test in scenario opensuse-Tumbleweed-DVD-s390x-textmode@s390x-zVM-vswitch-l2 fails in system_prepare
The command ‘chown bernhard /dev/hvc0 && usermod -a -G tty,dialout,$(stat -c %G /dev/hvc0) bernhard’ can not be executed without a timeout.

Test suite description

Maintainer: okurz
Installation in textmode and selecting the textmode "desktop" during installation.

Reproducible

Fails since (at least) Build 20201225 in textmode test suite for s390x

Expected result

Last good: 20201218 (or more recent)
There should be no timeout during the setting of permissions.

Further details

Always latest result in this scenario: latest

History

#1 - 2021-01-17 06:06 - okurz
This is an autogenerated message for openQA integration by the openqa_review script:
This bug is still referenced in a failing openQA test: textmode
https://openqa.opensuse.org/tests/1590501
To prevent further reminder comments one of the following options should be followed:
1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed

#2 - 2021-01-19 16:13 - skriesch
I have analyzed the Investigation part, since when system_prepare is failing with this timeout. There was following change before:
7da74069a Add system_prepare to dud scenario schedule

#3 - 2021-02-02 14:54 - skriesch
Successfull change of the timeout:
https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/11884

2021-05-21
That can be merged.

#5 - 2021-02-02 16:15 - AdaLovelace
- Status changed from In Progress to Resolved
- % Done changed from 90 to 100
