Description

Hello,

People on the forums complain that the security announcements that were posted
by a bot (openSUSE News) in the News & Announcments > Security Announcements
are no longer arriving. The last one was in November.

Is this due to some mishap or is it the result of some policy?

Met vriendelijke groet,
Henk van Velden

History

- Category set to Forum

- Assignee set to hellcp

- Private changed from Yes to No

This broke at the time we migrated to mailman3.

I'd *guess* (can someone confirm?) that the forums use the lists.o.o RSS feed, which is not available with mailman/hyperkitty.

Stasiek, Per mentioned in the meeting that you started some work on getting the RSS feeds back, therefore I'm assigning this ticket to you ;-)

I deployed the patch I made, so now urls like https://lists.opensuse.org/archives/list/factory@lists.opensuse.org/feed/ show the feed of newest mails
from every mailing list.

In case of any issues, report to https://gitlab.com/mailman/hyperkitty/-/merge_requests/302

Hi
Thanks, forum feed updated to: https://lists.opensuse.org/archives/list/security-announce@lists.opensuse.org/feed/mailinglist.rss and now see the
security feeds.

I wonder if we should add the Factory feed into the Forum as well....

I see it works again!

Thanks to all involved.

I will inform the OP here on the forums and thank him for reporting it.
