### MULTIPATH backend variable doesn't set HDDMODEL for aarch64

2021-01-13 16:48 - syrianidou\_sofia

<b>Status:</b>	New	<b>Start date:</b>	2021-01-13
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Concrete Bugs	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	future		
<b>Difficulty:</b>			
<b>Description</b>			
According to the definition of the variable, if MULTIPATH=1: "Add HDD drives as multipath devices. Override HDDMODEL to virtio-scsi-pci"			
That indeed happens when used on 64bit or ppc64le, but for aarch64, HDDMODEL remains to default value "virtio-blk-device". Test fails with error: "Device 'virtio-blk-device' can't go on SCSI bus". In order for the test to work, HDDMODEL needs to be set to "scsi-hd".

- Target version set to future

good issue description. Thank you for that. This sounds like it can be easily fixed by contributors other than the SUSE QE Tools team. Seems like this has not been observed on o3. Maybe you can consider adding relevant test cases there. If they would fail the same, maybe guillaume\_g/ggardet would be motivated to fix the issue soon then :)
