

qe-yast - action #87913

coordination # 87910 (New): Separate libyui REST API to separate cpan module

Create separe repo for perl libyui REST API and establish CI

2021-01-18 16:51 - riafarov

Status:	Closed	Start date:	2021-01-18
Priority:	Normal	Due date:	
Assignee:	riafarov	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	SLE 15 SP3		

Description

As a first step we should create separate repo and publish perl module to cpan

See <https://www.perl.com/article/how-to-upload-a-script-to-cpan/>

Acceptance criteria:

1. libyui git repo is created
2. CI runs tests and publishes perl module to the cpan

This task does not include replacing of our current LibyuiClient implementation in test repo with Cpan module. It is about creating the module in the parallel repo.
